

SEPSIS ATLAS

Clinical Evidence Engine

Transforming unstructured research into
analysis-ready, source-grounded knowledge

TEAM PLAN BLUE

2026

OUR SOLUTION

Vision + LLM pipeline that sees figures and tables, not just reads text

VISION-BASED PARSING

- > Sees figure images with multimodal AI
- > Cross-references with Markdown context
- > Extracts from figures text-only tools miss

5-LAYER SAFETY SYSTEM

- > Pydantic schema enforcement
- > "Not Reported" for missing data
- > RAG guardrails prevent hallucination
- > Hallucination trap test passes

END-TO-END TRACEABILITY

- > paper_id -> SHA-256 hash of PDF
- > figure_id -> exact figure + caption
- > page_number -> precise location
- > Source column in every output row

THE TECH PIPELINE

End-to-end architecture from PDF ingestion to query resolution
